CFPC Influenza (COVID-19) Health & Safety Policy Statement

This Commonwealth Fire Protection Company (CFPC) document is not a standard or regulation, and it creates no new legal obligations. It does however contain recommendations as well as descriptions of mandatory safety and health standards in the prevention of contracting and/or spreading of the SARS-CoV-2 and subsequently the COVID-19 virus referred to as the China “COVID-19” Disease. These recommendations are advisory in nature, informational in content, and are intended to assist employers and employees in providing and maintaining a safe workplace.

Corona Virus Disease 2019 (COVID-19) is a respiratory disease caused by the SARS-CoV-2 virus. It has spread from China to many other countries around the world, including the United States. To reduce the USA impact of COVID-19 outbreak conditions on businesses, workers, customers, and the public CFPC has established an Influenza Pandemic Prevention Plan (IPPP) to address the specific exposure risks, the sources of potential exposure, routine sanitation requirements along with routes of transmission and continual monitoring.

This document is based on the Occupational Safety and Health Administration (OSHA) COVID-19 planning guidance which is based on traditional infection prevention and industrial hygiene practices. The plan will highlight the actions taken by CFPC and its employees to implement engineering, administrative, and work practice controls along with personal protective equipment (PPE), as well as considerations for doing so.

Information contained in CFPC’s plan is derived from resources such as but not limited to:

- The OSHA COVID-19 webpage offering information specifically for workers and employers: www.osha.gov/covid-19.
- The U.S. Department of Health and Human Services’ Centers for Disease Control and Prevention (CDC) providing the latest information about COVID-19 and the global outbreak: www.cdc.gov/coronavirus/2019-ncov.

While CFPC has not currently experienced any impact, as the COVID-19 health emergency continues to evolve, the company and its employees have been consistently implementing precautions to confirm the health of our labor force, our supply chain partners for materials, and have implemented a protocol to maintain business continuity. As always, we welcome the opportunity to work together to develop risk avoidance and mitigation strategies for the ensured safety of all Americans.
