Fire Protection Contractor

April 3, 2020

To Whom it may concern,

Commonwealth Fire Protection is working on a limited basis as a life-sustaining operation meeting the exemptions set forth in Governor Wolfe's executive order on 3/23/2020.

CFPC services, maintains, and inspects life and property safety systems in PA, NJ, Del and Maryland. We also operate an office and trade shop in Delaware. All construction in Delaware and NJ are considered essential businesses and are permitted to be active. Our staff is following the Essential Business Pledge and specific CDC Guidelines. In PA, we are currently only servicing life sustaining businesses and medical facility construction that are permitting our access for service, maintenance or inspections.

We are currently working on a limited basis with field crews on health care facilities, other life sustaining businesses and on facilities with concerns of having their life safety systems out of service in the state of PA. We are working at active construction sites in NJ and Delaware.

We also have provided CDC recommended protections for limited office staff working within our Leola office as supporting staff to our active field, service and inspection personnel.

Sincerely,

Daniel J. Laird, President

Commonwealth Fire Protection Company

"Saving lives for over 40 years"
